Semi Frameless Glass Pool Fencing

Rest assured. We're experts.

With thousands of installations already completed, you can feel confident we really are the pool fencing experts.

Transform your pool.

Semi frameless glass is the most cost effective glass pool fencing. And it's still simply stunning.

Our semi-frameless pool fencing system partners 10mm toughened Grade A safety glass with 316L marine grade stainless steel posts and a glass clamp system.

We use an exclusive semi-frameless stainless steel post and mounting system to give any pool a luxurious, classy finish. Although the system is more cost effective than a fully frameless

approach, a semi-frameless solution still looks at home in even the most prestigious surroundings.

Like our frameless pool fencing, semi-frameless pool fencing elevates the glass from the ground, allowing easy cleaning and maintenance, while still ensuring that the barrier complies with all relevant safety legislations.

We only ever use the very best materials and components.

Posts

Our modular approach to stainless steel posts means that you can use the same system for core-drilled, base-plated and wall mounted applications, in your chosen height and configuration. All of our posts are beautifully designed and finished using the highest quality 316L marine grade stainless steel or are powdercoated aluminium.

Glass Clips

Our glass friction clamps hold glass panels safely and effectively. They are available with round or flat backs in d-shape and square formats, with EPDM rubbers to suit 8mm, 10mm & 12mm glass. They are constructed of 316L marine grade stainless steel, and tested to ensure they exceed all relevant standards.

Glass Gates

We always stock a wide range of glass gates – in a range of sizes and over 30 variations – so we are sure to be able to provide you with a gate to match your configuration and hardware choice

Gate Hardware

Our huge range of gate hardware includes hinges and latches to suit our entire glass pool fence product suite. We are proud to offer D&D Technologies' Magna Latch and Lockable Magna Latch products which are designed for safety, ease of operation, concealed fixing, and sleek design.

A good word. Or two.

We pride ourselves not only on our superior products but also our customer service. It's why people refer us. A lot.

Aqua Vista (Water View) really lives up to its name, our pool was taken out of it's 1980's prison bars and given a new lease of life. It's added great value to our home. The work was carried out quickly and the finish is exceptional. Thanks for the great job.

G Kyle, Sorrento

When we were shopping around for a pool fence it was hard enough trying to get someone to come out and see us, let alone to get the written quote. Aqua Vista Glass scores top marks on both accounts, plus we were told about a number of safety requirements that no-one else even mentioned. The quote came in quickly and the job was completed right on schedule.

T McCoy, Ascot

I am really pleased with your service, you have got the best fencing products and a very good price. You have saved us money and time.

L Lee, Westlake

I appreciated the time and effort that you took to build a top quality fence that made our pool area not only safe for our twin 1 year old boys, but also made it look 10 times better than a steel fence.

P. Lupton, Warner
