

AQUAVISTAGLASS
glass pool fencing and balustrade

Glass Balustrade

Rest assured. We're experts.

With thousands of installations already completed, you can feel confident we really are the balustrade experts.

Transform your property.

Glass balustrades offer a stylish and secure alternative to traditional balustrades. And it looks stunning.

We offer both frameless glass balustrade, fixed with mini post spigots or pin fixed, and semi frameless glass balustrade which is available with either stainless steel or powdercoated posts.

Our Grade A toughened heat-soaked glass and marine grade 2205 stainless steel hardware are manufactured to the highest standards, and

designed to complement the aesthetics of modern Australian architecture and design.

All of our products, glass, spigots, handrails and fixings are made of very high quality materials and exceed both Australian Standards and Building Codes Australia criteria.

We only ever use the very best materials and components.

Glass Panels

We stock a huge range of 10mm and 12mm frameless glass balustrade panels from 500mm to 1500mm in 50mm increments. Our standard glass is of the highest quality - heat-soaked to European Standard EN 14179, and toughened Grade A with an Australian Standard Benchmark licence.

Spigots

The spigots are balustrade-compliant made from 2205 stainless steel to ensure longer life and structural integrity. They are available in round and square profiles for core-drilled and base-plated applications.

Handrails

Our range of handrails provide a highly-designed but sleek and unobtrusive look in a 50x10mm profile. We have them available in easy-fit modular components, allowing for easy specification and installation. Top mount u-channel handrails are also available. Our handrail fittings are 316 marine grade stainless steel

Custom Glass

We are able to provide and install custom glass panels for staircases and other applications. Glass can be made to suit most situations as long as it is within the product engineering design limitations and complies to building codes and Australian Standards.

A good word. Or two.

We pride ourselves not only on our superior products but also our customer service. It's why people refer us. A lot.

We were very happy with Aqua Vista Glass. They advised us on what would look best for our particular area and carried out the work efficiently and courteously and we are very happy with the end result.

R Flegg, Scarborough

Aqua Vista Glass has a genuine understanding of customer service and knows how to run a business. Additionally, the staff seems happy to work for them which makes for a pleasant installation. They understand good design – they can provide valued input to the overall look, instead of just saying yes to anything the customer asked for (e.g. I wanted black but am now so glad I went for silver). Very good value product. Excellent communication. Never left chasing or wondering what's happening.

Jacinta, Bridgeman Downs

I have just built a new house and the service, price and product that Aqua Vista Glass provided was well above expectations. We purchased fencing as well as balustrade and both products definitely give a quality aspect to the house.

G Belcher, Carindale

I would recommend AVG to anyone wanting a high quality product with first class customer service. Thanks again for a great job

Rob and Rebecca, Forest Lake
