

# Enduro Shield

**AQUAVISTAGLASS**  
glass pool fencing and balustrade

The difference is clear

# Keep the sparkle.

## Reduce cleaning time by up to 90%.

EnduroShield is perfect for glass pool fencing and balustrade.

The permanent\* non-stick coating will protect your glass against corrosion and etching from contaminants such as sea salt, dirt and grime.

When applied to your glass panels at our custom built facility, EnduroShield is backed by a 10 year warranty.

A once only application will make dirt and grime easier to clean off and reduce cleaning time by up to 90%.

It will also protect against corrosion and etching caused by contaminants including: sea salt, bird droppings and pollution.

Glass which is not treated will be more difficult to clean and maintain as it ages.

## Exceptional benefits

### Long lasting

A once only application which permanently bonds to the glass. With a regular light clean, there's no need to 'revitalise' in a few years.

### Coating is UV stable

Accelerated testing has been undertaken with exposure to alternating cycles of UV light and condensation. Results show minimal or no change in the product's efficacy.

### Protects glass in toughest conditions

Untreated glass is porous and as a result it absorbs contaminants and pollution which cause deterioration and discolouration. EnduroShield seals the porosity of the glass to help prevent deterioration.

### Backed by warranty

When EnduroShield is applied directly to new glass in the Aqua Vista Glass factory it is backed by our 10 year warranty.

## DIY kits also available

**EnduroShield is also available for glass fencing and balustrade in 'do-it-yourself' kit form.**

It is a clear product which is simply sprayed on and then polished in to the glass, creating a permanent bond.

When applied to existing glass, EnduroShield comes with a 3 year warranty. It's simple to apply and dries in minutes.

\*Based on 10 years of simulated normal use and certified by TÜV Rheinland, Germany.
