glass pool fencing and balustrade

Frameless Glass Pool Fencing

# Rest assured. We're experts.

With thousands of installations already completed, you can feel confident we really are the pool fencing experts.

# Guaranteed to impress.

Safe, stylish, sleek and simply stunning. Frameless glass is the ultimate in pool fencing.

Safety and beauty are combined in a cost effective adaptive, modular system that will transform any established home's pool area and compliment any new development project.

It is engineered and designed to meet all Australian Standards and every component of our fencing system has been tested to comply with relevant safety standards.

All of our frameless glass pool fencing panels are Grade A, 12mm thick, toughened glass with flat polished edges and 2mm radius corners.

We stock glass panel widths from 100mm to 1800mm in length (in 50mm increments) and this glass range is available immediately, ensuring there are never any installation delays for both residential and commercial projects.

## We offer premium and value ranges of all our fencing components to suit all budgets and installations.

### Spigots

The premium range is balustrade-compliant made from 2205 stainless steel to ensure longer life and structural integrity. The value range is manufactured using investment casting technology. Both ranges are high quality marine grade 2205 stainless steel and are available in round and square profiles for core-drilled and base-plated applications.

### Hinge Panels

The value range of hinge panels are 12mm Grade A toughened glass in sizes ranging from 1000mm to 1700mm for use with spring hinges. The premium range use soft-closing glass-mounted oil-dampened springs to provide a premium experience. Again, we stock all sizes from 1000mm to 1700mm.

### Glass Gates

The value range of glass gates are 8mm Grade A glass suitable for spring hinge panels and stainless steel posts. All are available in 25mm increments from 700mm to 1000mm. The premium range hydraulic soft-close gates are 12mm toughened glass that range in size from 800mm to 1000mm in 50mm increments.

### Gate Hardware

We stock a full range of gate hardware to complement our entire glass pool fence product suite. Our hinges and latches utilise the renowned safety and engineering of D&D Technologies' Magna Latch and Lockable Magna Latch. We also offer soft-closing hydraulic hinges.

# A good word. Or two.

We pride ourselves not only on our superior products but also our customer service. It's why people refer us. A lot.

We found the AVG team to be friendly, prompt, and efficient. Their expertise and attention to detail was beyond our expectations. I would recommend AVG to anyone wanting a high quality product with first class customer service. Thanks again for a great job!

*Rob and Rebecca, Forest Lake*

Not only was the product spot on, the design, layout drawing and installation instructions were spot on and it was a pleasure to deal with such a helpful business. Aqua Vista Glass went to "Nth" degree to ensure that the installations went smoothly.

*C Dunford, Redland Bay*

Aqua Vista Glass provide an excellent product and the company's problem solving abilities, esp with tricky pool fence regulations was greatly appreciated. All my friends are envious, not only because our pool fence looks great, but they are amazed at the great price I paid.

*Abby, Coorparoo*

The finished product is exactly what we were after and exactly what Aqua Vista promised to supply and install. We would not hesitate in recommending Aqua Vista Glass to our family and friends, in fact, we have already done this.
